HELI

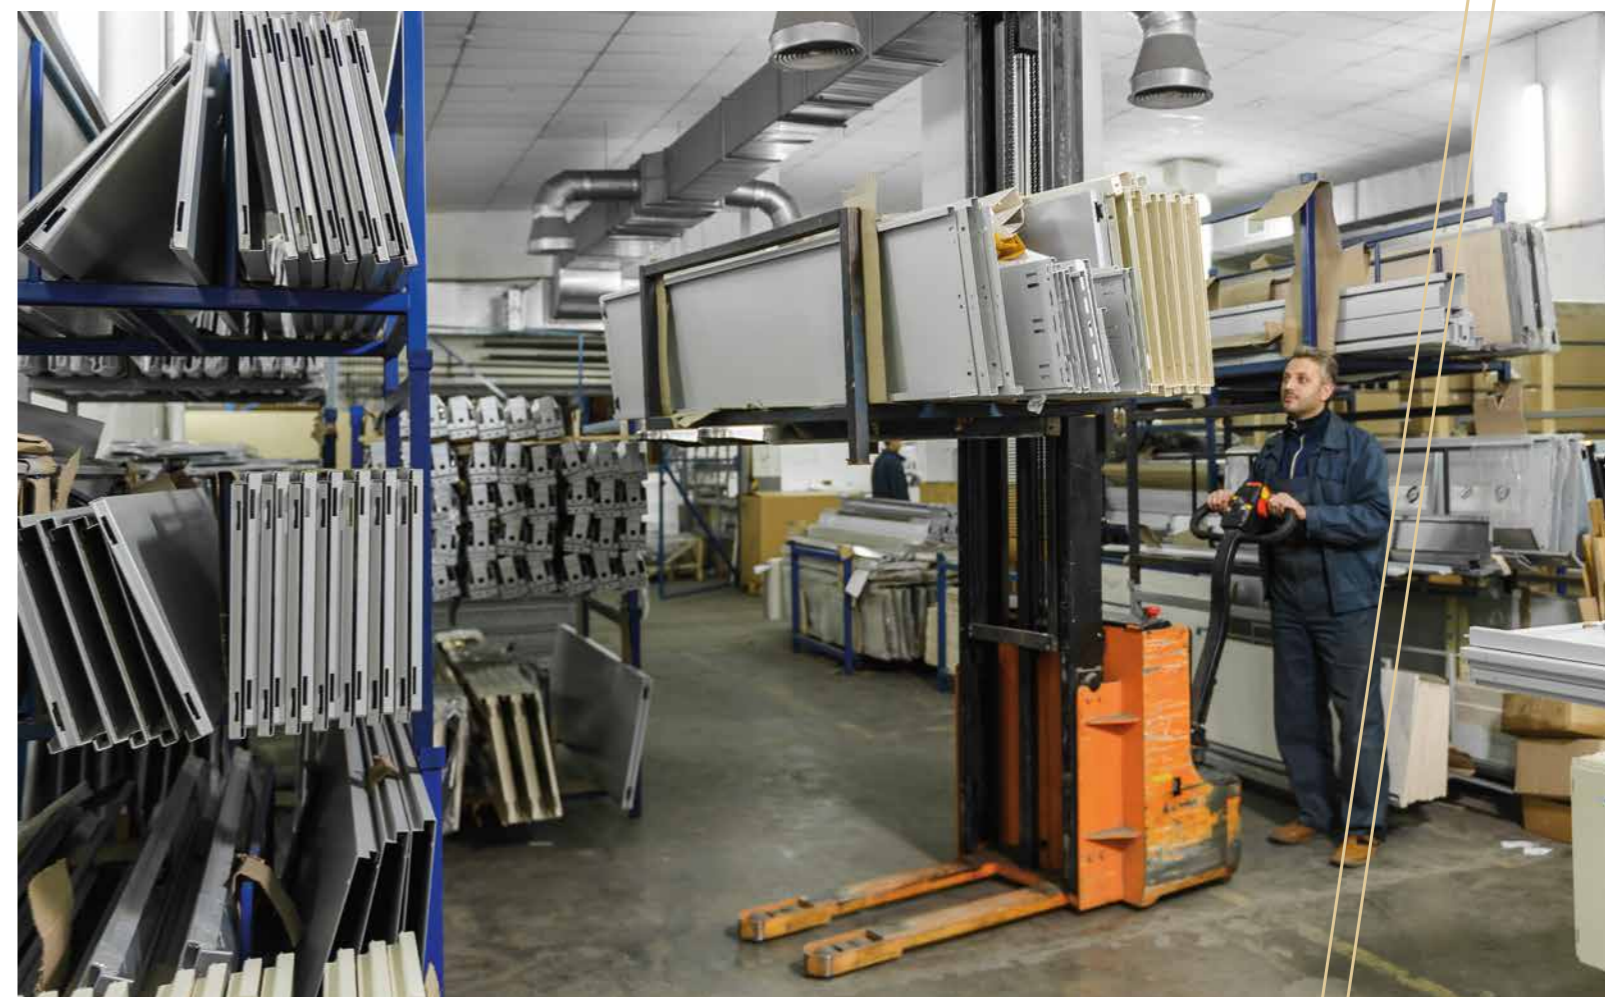

ASSEMBLY SHOP

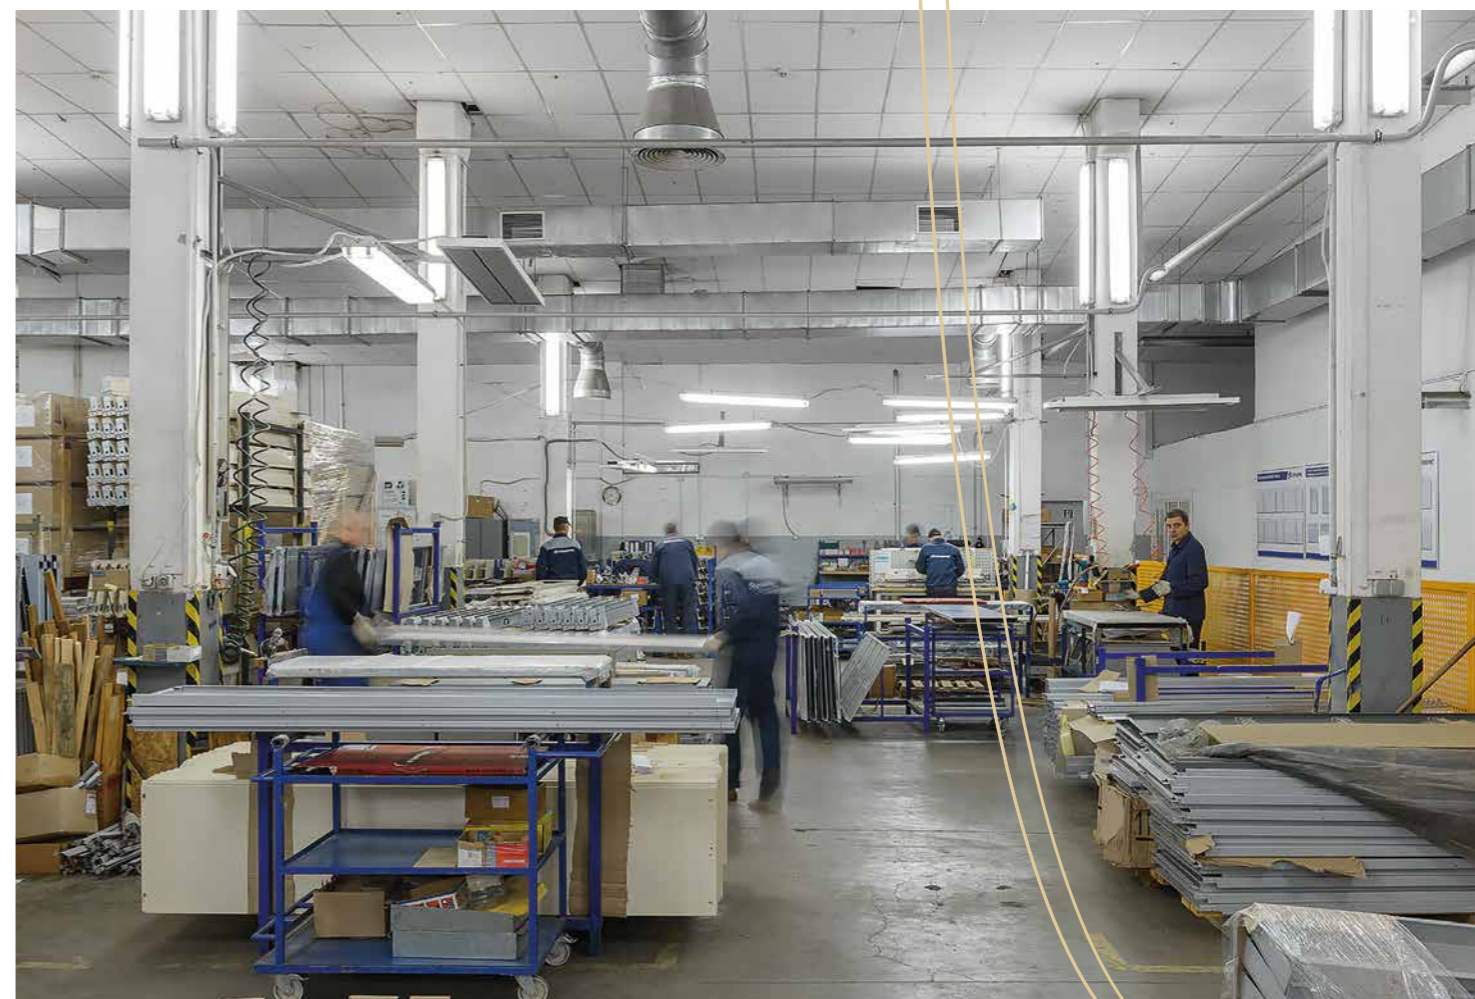

The elevator units are assembled here: fitting the elevator equipment (buffers, overspeed control units, tensioners, steel ropes, etc.), assembling compartment cabins, assembling hoistway door mechanisms, fitting components for installing the guides, assembling cabin and counterweight frames, hoist frame, etc.

The electrical equipment—control panels, call panels, indicators, terminal boxes, etc.—is assembled at the electrical section.

Before shipping, all electrical equipment undergoes inspection testing.

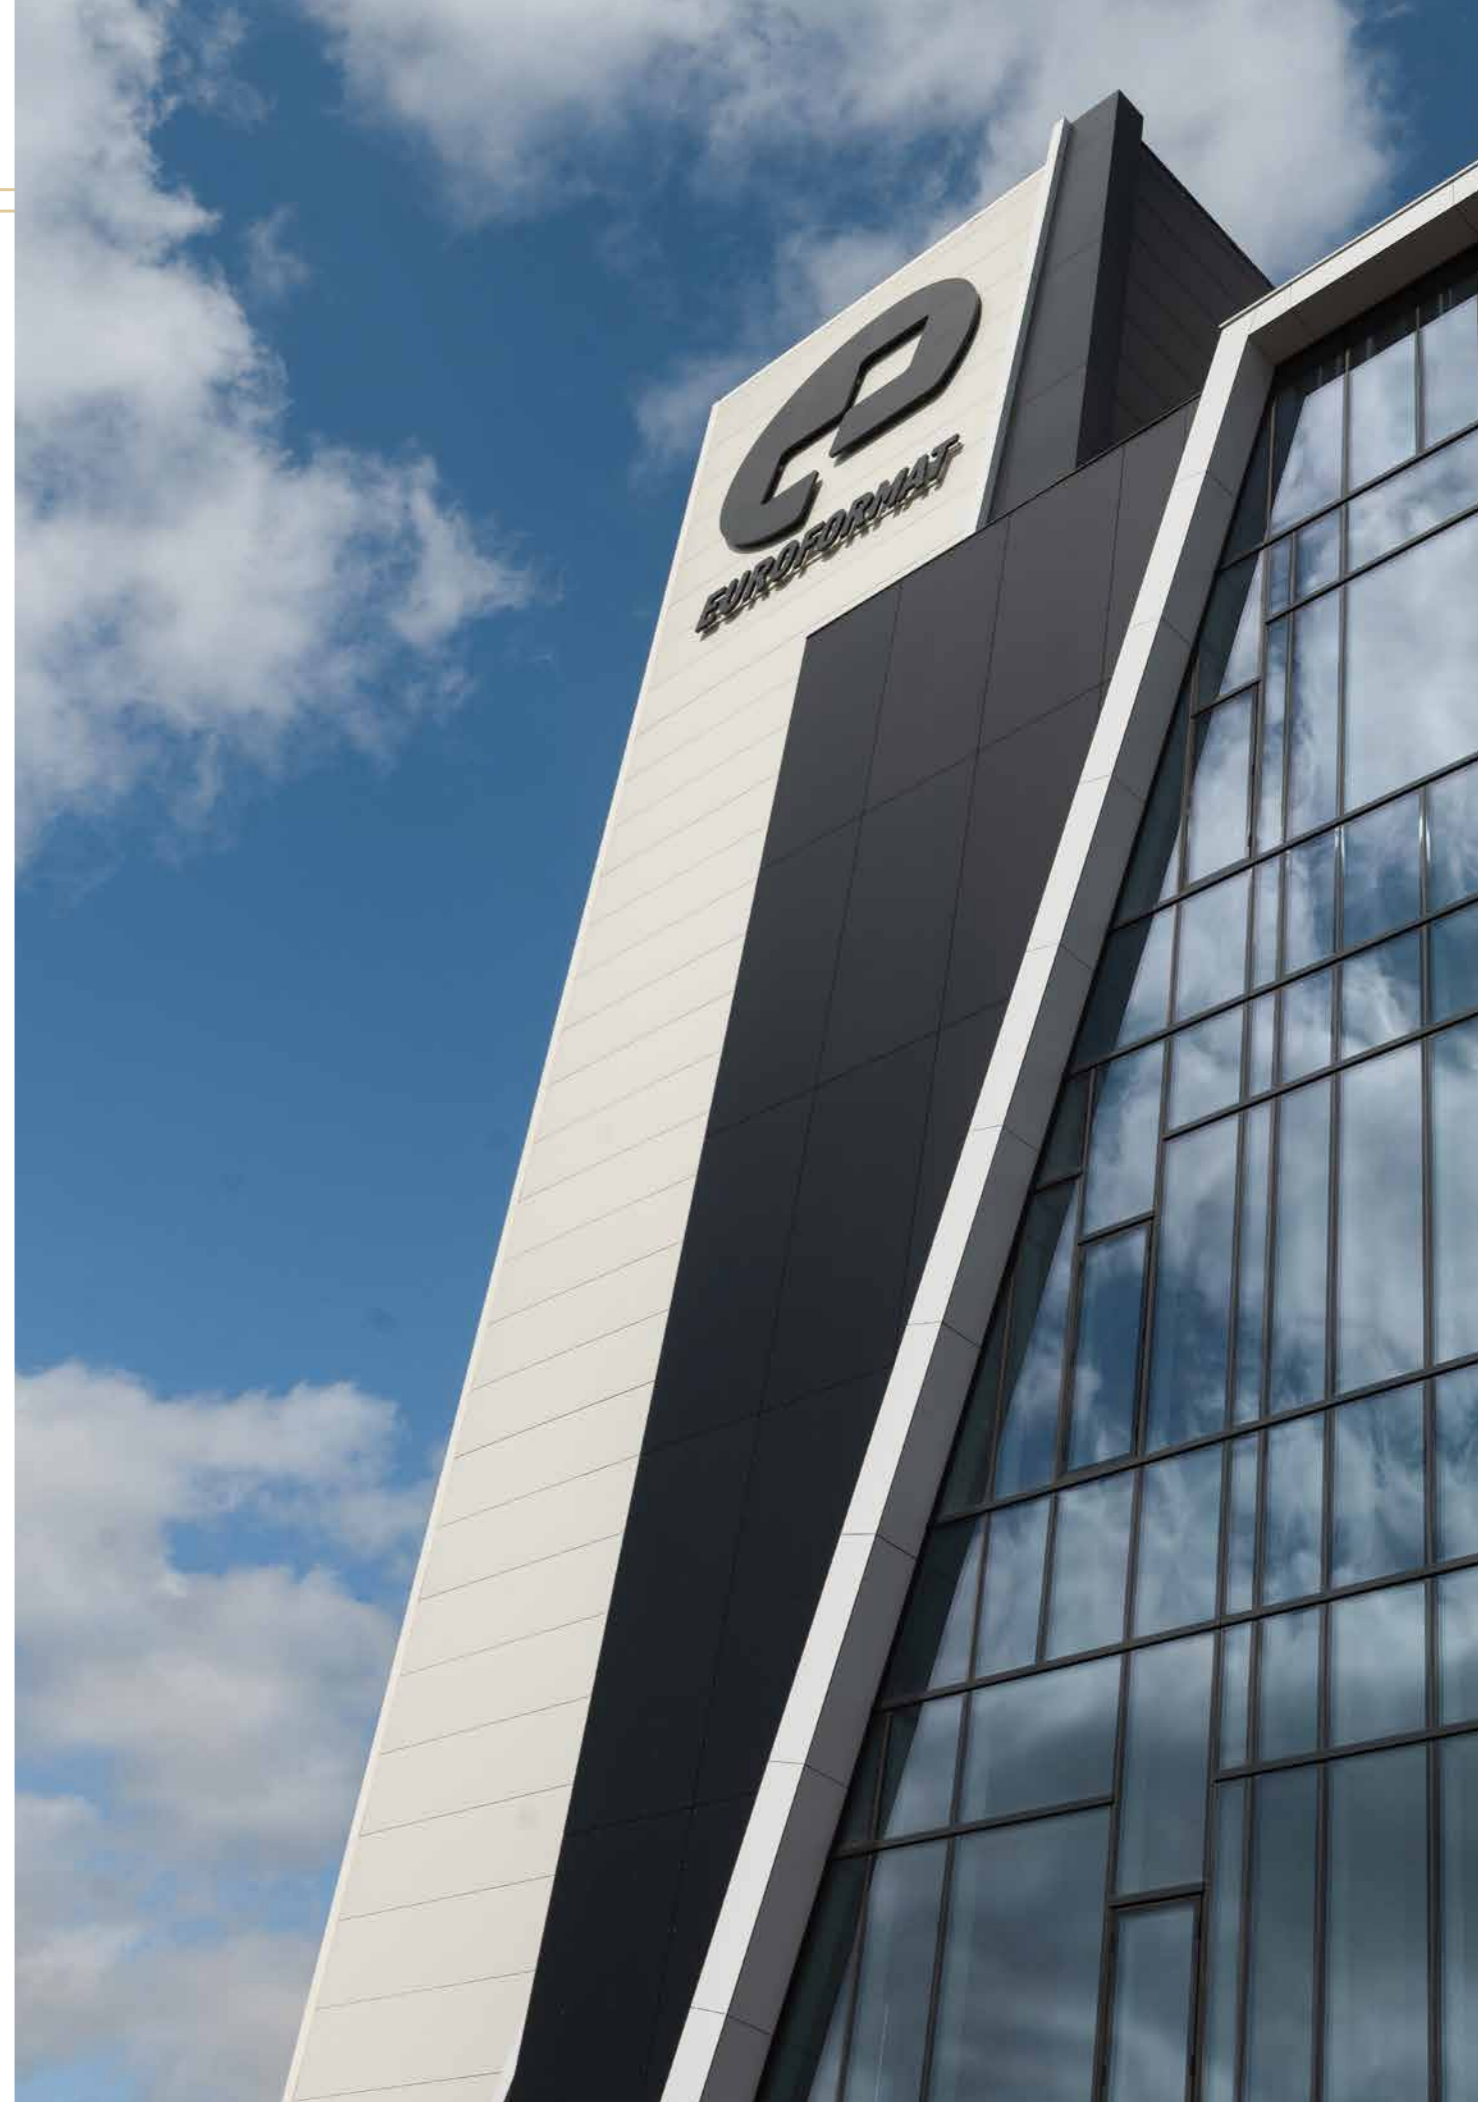

TEST ELEVATOR TOWER

The only elevator test tower in Ukraine operates at the Euroformat new plant. The tower allows testing all of the solutions developed by the plant's design engineers. The height of the test tower is 40 m.
